1. Gather photos to submit. You can upload photos for the online Memorial as a single file if you select them all in a Windows folder and right click and send to a compressed folder. That will create a .zip file that you can attach to the form. That is how you send multiple picture files.

2. Write an Obituary for the online Memorial. It can be up to 1000 characters long. Get the photos and the Obit ready and return to the Memorial form to form a complete Memorial Submission.
